RE: TRASH

Dear Homeowners,

In accordance with 7.06 of the Declaration, please be reminded that when putting your trash out on the curb it must be in a can or receptacle rather than simply in a trash bag. Trash bags and loose items on the curb they are susceptible to blowing about the community and/or being ravaged through by rodents and animals. Keeping your trash in a receptacle with a lid is the easiest way to keep our community clean. The board is faced with hiring our landscapers to clean up trash that is blowing about the community. This is an added cost to our budget that is not planned for. Also please be sure all trash receptacles are brought indoors as soon as possible after collection and not stored outside throughout the week.

Thank You,

Heatherbrook Homeowners Association
